

Bzctno3. 1611.

A new Almanacke and
Prognostication, for the
yeare of our Lord
God. 1611.

Being the third from the Bissextile
or Leape yeare.

N. Ephemerides

Calculated and composed according
to Art, for the latitude and meridian
of the honorable Citie of London
and may very well serve all
the south parts of great
Britaine.

By Thomas Brenor, Teacher of
Arithmetique and Geometry, in
the most famous Citie
of London.

Printed at London for the Com-
pany of the Stationers.

A note of the moouea-
ble feasts according to
our account.

The reformed account
beyond the Seas.

THE ANATOMY OF MANS body, as the parts thereof are governed by the 12. celestiall signes.

| | | |
|--|--|--|
| <p>Taurus Necke & throat Cancer Brest, & muche & lungs. Virgo Guts & belly. Scorpio secrets & bladder. Capricornus the knees.</p> | <p>Aries The head and face</p> | <p>Gemini Armes & shoulders</p> |
|  | <p>Leo heart & backe.</p> | <p>Libra Reines & loins</p> |
| | <p>Sagittarius thighes</p> | <p>Aquarius the legs.</p> |
| | <p>Pisces The feet.</p> | |

Curious Reader, I have purposely omitted the changes, fulls, and quarters of the moone, as they are usually mentioned in every Almanacke, in regard they are repeated verbatim in the prognostication, and in stead thereof have set downe the same in characters, together with other aspects of the planets, as well with the moone as among themselves, for the better direction of the seasons, to edmonst as taken hand any physical matter to haefore.

January hath xxxi. dayes.

Bretnoꝝ

1611.

A Prognostication for
this present yeare of our
Lord God, M. DC. XI.

Being the third from the Bissextile
or leape-yeare.

Wherein besides the generall state of
the foure quarters of the yeare, and
the weekely disposition thereof,
are briefly set downe sundry Phy-
sicall notes, and other directions of
good consequence.

Together with the effects of the lunare Ec-
lipse which happened last yeare, and others,
which will appeare this present yeare 1611.

Physically argued from the severall ha-
bitudes and affects of this our earthly Orbe, to that
of *Light* and others, and of all of them
one to another,

By *Thomas Bretnoꝝ* practitioner in Physicke.

LONDON.

Printed for the Company of Stationers 1611.

Cum privilegio.

To the Reader.

O please euery mans humour with any one kind of subiect how well penned soeuer, is a thing meerly impossible; and therefore I shall be the lesse agreeued (curteous reader) if these my rude lines finde no better acceptation then they deserue, as not being indighted with such graue iudgement, as belongeth to this Art: onely my desire is not to be misconstrued in my prædictions and symboles, in regard they are generall and not particular, or pertinent to euery indiuiduall person or imployment: and therefore howsoeuer some men more precise and of nicer consciences then the rest, may seeme to finde fault with them; yet if it be truly granted, that prædictions may be giuen, & that lawfully, as by diuine writ is very probable; I could wish such for commo curtesie or charity sake not to misprize or maligne the honest indeauours of him whom neither desire of affectation, or other idle conceipt, but the good of the country and common wealth wherein he liueth, hath moued to vndertake those and other labours of greater consequence. Farewell.

THe country swaine himselfe will ouer night,
 presage what kind the morrow day shall be;
 And shall not he whose ol iect's heate and light,
 Fore-tell the same in better sort then he?
 Art ioyned with nature wonders doth effect,
 Art without nature is of small respect.
 The fowles of heauen, and beasts, and plants on earth,
 Do truly shew the seasons, time, and change,
 Of weather age, of plenty, warres, and dearth,
 A moneth sometimes and more before they range;
 And shall not man whose spirit is diuine,
 Of these effects a truer terme assene?
 O were man wise and free from hellish sin:
 How soone good Arts and knowledge might he win?

Thomas Bretnor.

Can

Certaine Physicall directions, and first of *Phlebotomy*.

Let blood at no time except
upon very urgent occasiō.
And then not without es-
peciall regard of these things
following. viz. _____

The time of the yeare. The
complexion, strength, and
the age of the patient. The
place and configuration of
the Moone.

For the time of the yeare. The Spring and Autumne are
most fit and wholsome, as freest from sleeping cold, and par-
ching heate; with this Promise, that blood bee taken in the
Spring time from the right side. & in Autumne from the left.

For the complexion: Generally let blood, the Moone in Aries,
first halfe of Libra, and Aquarius.

But more particularly let blood

| | | |
|---|---------------------------|---|
| <p>{ Phlegmaticke. { Cholericke. { Melancholicke. { Sagine.</p> | <p>} The Moone in</p> | <p>{ Aries or Sagittary. { Cancer or Pisces. { Aquarius, Libra first halfe any of them,</p> |
|---|---------------------------|---|

And for yeares let blood,

| | | |
|---|-----------------------|--|
| <p>Younger middle aged more aged decipit.</p> | <p>} from the</p> | <p>{ Change to the first quarter. { First quarter to the Full. { Full to the last quarter. { Last quarter to change.</p> |
|---|-----------------------|--|

The most laudable aspects for this purpose are the con-
junction of the Moone with Iupiter or Venus, and her Trine or
Sertile with them, and with the Sunne and Mercury in combat.

The Moones trine and sertile with Mars: as also her quar-
tily and opposition with Iupiter and Venus, are indifferent.

But in any case, let not the Moone at such time be neare the
conjunction, quartily or opposition of the Sunne, Saturne or
Mars: or any of them, with like configuration with other.

Make Scarification in like signes and aspects as in Phlebo-
tomy, saving that this is effected with better successe the moone
increasing.

For purging

As in Phlebotomy, so likewise in purging, great care ought
to be taken of the time of the yeare, strength and constituti-
on of the patient, place and configuration of the Moone, &c.

A prognostication

And surely as purgative medicines taken at any time without great need are very dangerous: so violent purgations can never be administered, without great prejudice to the bodies state: for that their venemous and virulent quality cannot be so clearly evacuated but there will be left some dregges of their coroding nature.

The seasons prescribed in Phlebotomy are also good for this purpose: and summer is not amisse, if the canticular dates prove not too untemperately hote: for such is the state thereof for the most with us, that it little differeth from their Spring in Spaine, or the South part of France: and seeing that our countreinmen are more gotten to suffer then they, and that Plus ne cat gula quam enis, I with them either to avoid that common linne, or by physicall meanes seeke to prevent future maladies.

And that the medicine may worke with better successe, purge ever in the waine of the Moone with this consideration also, that

Bretnor. 1611.

She being then placed vnder γ , ϵ , δ , η , θ and in a Δ of κ aspects of ι together with χ of λ .

Grafte or plant the ζ in δ of π and in like configuration.

Cut or dreffe vines at the Full of the Moone, and when she is in δ , η of λ .

Set or remooue plants, rootes, and such like from the change to the Full.

Seld or libbe cattell, from the last quarter to the change the κ placed in γ of λ .

Sheare or clippe sheepe the moone increasing.

Fell Timber for buiding from St. Martins day, untill mid January, and in the Last quarter of the moone.

Plash hedges and loppe trees for fuelle the ζ increasing in γ of δ and apected of Iupiter and Venus.

Cut haire the better to grow, the moone in δ , η of δ and in a Δ of κ of Iupiter or Venus increasing.

To destroy haire, cornes, wens, warts or such like excrescences, cut them in the last quarter, and when she is in δ , η of δ of Saturne or Mars.

Weane or take children from nurse towards the Full, when she is void of course, and is not seated in δ of δ .

Hunt wilde beasts the Moone in γ of δ of λ and in a good aspect of χ of λ and the ascendent mooueable.

Hauke for fowles the ζ in Gemini, Virgo, Sagittary or Pisces, and in a good aspect of Iupiter, Venus or Mercury.

Set saile the ζ increasing, and when she is swift in course, & separated from a Δ of κ of the \odot , \star , λ or λ not retrograde or combust, and applyeth vnto any of them with like illumination.

Likewise the ascendent or watry signes and the Lord thereof in the 3 or 9 house fortunate, or in a good aspect with the Lord of either of them: or either of the fortunes, or λ in the 1, 3, or 9, house well affected, do note a prosperous and speedy voyage.

But in any case let not the ζ or Lord of the ascendent be conioyned with the horry constellations of Orion Arcturus, Canis Maior, or Minor, the Hædi or Hircus: or ioyned, or configured with any retrograde or vnforgunate planet, or the ζ , or any infortunate in the 1, 7, or 4, house, or Mars or Saturne angular,

A Prognostication.

A perfect and easie way to finde the time of high-water in most places of this Kingdome, and countries adioyning.

In the Calender is set downe the howre and minute of full-
sea at London-bridge: for every day in the moneth, accor-
ding to the Moones motion; which although it may be hin-
dered or furthered by winds or land-floods, as the one is stated,
and the other falleth: yet as these are sildome extreme, so they
do not often cause any great difference in time. If therfore you
desire to know the time of full sea in any place here noted, looke
for the day of the moneth, and against the same right-wards
(looking to the forea gne account) you shall finde the howre
and minute of full sea at London-bridge: and for any other place
adde or subtract so many howres and minutes to or from the
time there set downe, as this little table following shal appoint:
and the totall of the one, or remainder of the other, shal be the
time required.

Example.

The 18. of January I would know the time of full-sea, at
London-bridge: Against that day in the colunne under the ti-
tle I finde that it is high water there at 3. a clocke: then desi-
ring to know what time it shall be full sea the same day at Linne,
Humber, Weymouth, &c. I adde three howres (as this Table
following sheweth) and it maketh 6. a clocke the time of full-sea
in all those places. And for Grauesend, Donnes, Tenet &c. sub-
tracting an howre and an halfe, I finde full-sea there halfe an
howre past one: and so of all the rest.

The Tide-table.

For these places hou. and min.

The Characters of the Planets and Signes with the inter-
sections, Coniunction, and aspects.

♄ Saturne ♃ Jupiter ♂ Mars ☉ the Sonne.
♀ Venus ☿ Mercury ☾ the Moone
♈ Aries ♉ Taurus ♊ Gemini ♋ Cancer ♌ Leo.
♍ Virgo ♎ Libra ♏ Scorpio ♐ Sagittarius.
♑ Capricornus ♒ Aquarius ♒ Pisces.
♊ Dragons-head & Dragons-tail:
☉ Coniunction or change * Sexile ☽ Quartile.
♊ Trine & opposition or full.

Their vse in the Almanacke.

Desiring to know the day, howre, and minute of the character
or full, or any other aspect of the Moone with the Sun. or any
other Planet or Planets among themselves, do but consider
what character doth represent such an aspect, be it coniunction,
Sextile, square or opposition, and search out the same in the 5.
columnne for the ☉, ☽ or ♀ of the Sun & Moone, or in the 6. for
any other Planet (noting that the letter a aduoyning signifyeth
the time before noone. & p. the time after) & right ouer against
the same lettward you may perceiue what day of the month
such an aspect falleth on.

Example.

Ouer against the 4 day of January in the 5 columnne, I finde
a pointing to the characters of the Sun and Moone, whereby
I know the Moone changeth that day at London 3 quarters
past a in the forenoon: and ouer against the 18 day I finde a.
which

A Prognostication.

which signifieth full-moone the same day there at one a clock and 43 minutes in the afternoone, and so of all other.

A Table of the rhombe and distance &c. of some
of the most famous Citties in the world from

Bretnor. 1611.

The former Table consisteth of 5 columnes, the first where-
of containeth the names of citties, the second, the rhombe
or point of the compass they beare or are situated from London;
the third, the distance of each of them from the said city: the
4 the time of sunne rising before it doth at London mark'd
with this letter A, or the time after noted with the letter P: the
5 and last, the quantity of the longest day in euery of the said
places. If therefore you would know the rhombe and distance
to betwixt the city of London and Ierusalem: or betwixt any
of the said citties and the same, there needeth no further labour
but directly vnder the title and ouer against the place required,
you may finde your desire in such easie manner that further di-
rections were needlesse.

Of the Eclipses happening this yeare 1611..

Neither shall the Sun or Moone this yeare (in the view
of vs Britanian inhabitants) suffer Eclipsation of gla-
rious rayes or borrowed sun-shine: But the Calde-
ans and dwellers neare vnto the girdle of the world, shall beholde
the bright beames of beauteous Iuan obscured fro them by the
interposition of their Gran dame Ops twixt them and the Sun
vpon the Last day of May: at which time those wretched Nations
shall see the sun (for a small space) totally darkened, whose effects
will rage amongst them in cruell murders, and savage plea-
des both at sea and on shore.

The Africaners also, and the Ilanders of Madagassar or Saint
Laurence shall see the same glorious Planet. Sol his light well
neare hidden from them vpon the 23 of Nouember, which
Eclipsatio portendeth not onely fatall dissentions amongst the,
but also death of their Camels, and other great cattell. Also this
Eclipse portendeth no good to Spaigne, Hungaria &c.

Although we in England shall see no such Eclipse this yeare,
yet are we likely to feele not onely continuance of the fatall ef-
fects of the late great conjunction of Saturne and Iupiter which
happened the 12 of December 1603. but also of the Moone her
Eclipse the 20 of December 1610. whose effects comming in
force the 10 of October this yeare, and ending the 25 of Decem-
ber following, presignifie not onely durance of Gods heauy i-
sitation amongst vs, by sicknesses of dangerous and doubtfull
natures, but also (according to Proclus) stirre vp warres, sedi-
tion and garboses on all sides, and that especially about religi-
on

A Prognostication.

on matters of the Church, for that the Moone is afflicted in the 9 house, which principally betokeneth such things; as also hindrances disturbance, and losses in long iournyes as well by sea as land. The countries that are most subiect vnto these dire events, are Numidia, Africke, &c. France, Burgondy, Holland, Zeland, &c. and the citties of Constantinople, Tunic, Venice, Geneva, Pisa, Millaine, Yorke, S. Andrewes, Lubeck &c. And all such as haue the 8 degree of Cancer, ascending or culminating, shall suffer losse of health or deprivation of honour, ni Deus avertat.

Of other Eclipses happening this yeare, and *first of the Sunne and Mars.*

VVether it be materiall to knowe the true distance or elongation of the planets from vs in altitudes knowing their effects when they come to any certaine point in Longitude, I leaue determinable to those who (finding the motion of Mars to be anomalous or vncertaine, and his pericell (being perigeall) greater then that of the sun) conjecture or rather prone that this Systeme or Dybe is setted vnder the sun, especially in his perigeallity: which whether it be so neare his Apogeeity may plainly appeare the 8 of September in the evening, when the fiery Planet Mars shall either Eclipse the sun, or be partly Eclipsed of him. The Medium wherof happening in the 6. house, and religious signe Libra, may giue argument of such matters, as I leaue to the consideration of the learned Astrologian.

The beautifull Planet Venus will likewise be a spot in the Suns garment the 2 of December at 3 a clocke & 6. minutes in the afternoone; which happening in the 7 house neare vnto the Dragons taile, & in a square of the Moon, may very well pretend breaches and disloyalties in Medlocks by the licentious and loose carriage of both sexes, much losse by women seruants, and many open and scandalous enemies.

The goodly Planet Iupiter will likewise be intercepted from our sight, by the interposition of warlike Mars, the 23 of May at eight a clocke in the evening, which falleth out in the 8 house and in a square of Venus gouernesse of the 6, may signify many distempered or distastful diseases, not with out fatall end (especially) to the fauours of faction;

Bretnor. 1611.]

Of the foure quarters of the yeare, and
first of Winter.

AT the same Instant, as the sole-heating and lighting Planet Sol appeared furthest declined from the bane of our inhabitation, or the same point rather furthest directed from him, did the Bynnall quarter take his first entry or beginning, which at London, and all other places of the same Longitude, was upon the 11 day of December 1610 at 9 a clocke 7 minutes in the afternoon, the very beginning of Virgo ascending causing then shortest daies and longest nights to all Northern inhabitants.

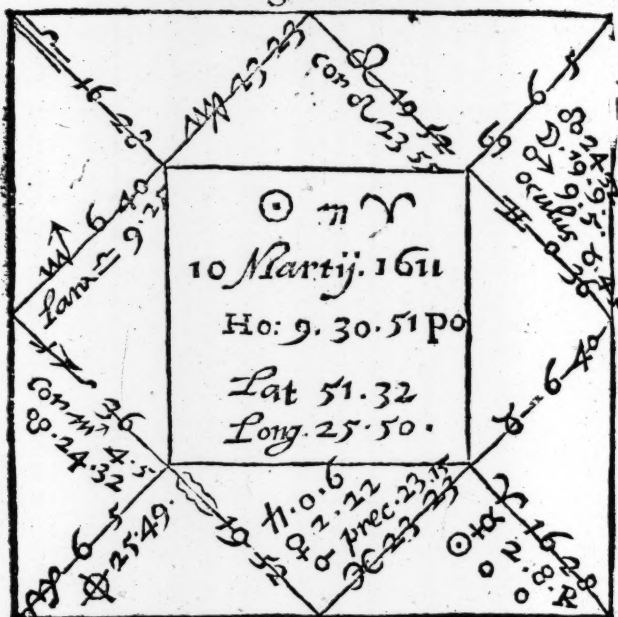

The Quarter as it is naturally cold and moist, fith resembling old age, so is it likely to prove, if not extraordinary; for that chieflie Venus haunting too much the company of cold Saturne this quarter will not onely speed in the aspect of stormy raine and snow, but in mens bodies much distemperance & many strange diseases.

Of the Spring.

The Spring is alwaies said to take his beginning at such a time as the Sunne and earth respect each other at right Angles: or when the Sunne appeareth to be in the same point, where the Equinoctiall and the Eccipticke do vntually crosse each other, causing then equall daies and nights to the whole winters, which will be this yeare (after Tychonicall calculation) upon the 10 of March at 9 a clocke 30 minutes, and 5 seconds at night, the Distance of heauen being at that time thus stated, and the precedent continuation happening in the 23 degrees 15 minutes of Pisces, and in the 9 house: whereby is prefigured that in this yeares resolution will be much transmigration, plantation, & packing beyond seas, with variable success; many wholesome decrees for religion's establishment: great hurly-burly and rumors of warres: much bloodshed of and by swaggering mates and vncely rosters. Enraged old men & wanton damzels are like to bay repentance at a high rate: many seruants will prove both false and fugitive: contagious sicknesses and sudden death pretended to many: much moisture and many stormes prefigured, yet dearth of nothing but charity & zeale is doubted, vnlesse our crying sinns and thanklesse heartes will drawne Gods heavy hand vpon vs.

Of

A Prognostication.

Of Summer.

VVhen this part of our Dye hath volued himselfe to the furthest point of his southerne inclination, & greatest portion of sun-shine, or the Sun (after the old opinion) approached his nearest limit to our Zenith, the is Sommer said to beginne, which this yeare will be the 12 day of June at one a clocke and 46 minutes in the morning, the 25 degree of Taurus ascending: the Poone in the same degrees of Scorpio directly opposite: which may give signification that this quarter will something digresse from his naturall temperature of heat, and Drought for the multitude of stormy gulls, & thunderclaps that are likely to haunt the same; venereous and contagious diseases will abound, many loole women will turne themselves, and much disorder for lacke of discipline, a number

Bretnor. 1611.

of hollow hearted friends & time servers will happen this season, for now the world begins to turne vplside downe.

Of haruest.

A Autumne commonly taken for the fourth part of the Astronomical yeare, will take his beginning, when the Sun and earth do againe aspect each other face to face, and the earth acquire a like portion of shadow and Sun-shine, which will be the 13 of September at 4 a clock, and 10 minutes in the afternoone, the 3 degree of Aquarius ascending, at which instant the Sunne or earth, choose you whether, shall enter the first minute of the Equinoctiall ligne Libra.

This quarter is like to be pestered now and then with house-hornes and lofty gales of wind, and cooling showers; and will not be free fro such sicknelles as usually haunt the same, namely dangerous and contagious fevers, Gonorrheas passio, Morbilli, Variolæ, Dysenteries, Jaundice of both sorts, commotions, coughs and many strange diseases of melancholy nature.

A more particular prædiction as well of the rising and setting of the Planets, and aires daily disposition, as of the good and euill daies in euery moneth, for the better election of fit seasons to take any weighty matter in hand.

January.

¶ Saturne and Venus are evening starres, Iupiter & to ☉, risen when he setteth; Mars is South-east at Sunne setting, Mercury is our morning starre vntillene.

The first day very kindly, weather the 2 & 3 more stormy. New Moone the 4 day, 3 quarters past two a clocke in the morning, the 16 of ♈ ascending, some drying snow or stormy weather this quarter, especially about the 6 and 7 daies, the 8, 9 and 10 seasonable.

First quarter the 11 day, at 11 a clocke & 4 minutes at night, the 14 of ♈ ascending, milde and kindly weather for the most part this quarter, if not too open.

A Prognostication.

Fall Moone the 18 Day at one a clocke and 43 minutes in the afternoone, the 8 of ♀ ascending, some know fall this quarter, cold blaes a breeding.

Last quarter the 25 Day halfe an houre past a clocke in the afternoone, the 15 of ♀ ascending, & 26. 27 & 28 daies, something solitarie, the rest of the quarter very seasonable.

- good daies
1. most voices
 2. a welcome guest
 7. 8. it falls into thy mouth
 9. 10. prettily handled.
 14. 15. a present well accepted.
 16. scant cater-cornes
 20. the later the better
 23. as sure as a clubbe
 28. be merry and wile

- mild daies
3. 4. a blind bargaine.
 5. post not too fast
 6. as kind as a lute
 11. 12. grapple not with him
 13. about thy reach
 17. 24. pause a while
 18. 19. a strong adversary
 21. 22. had I wist
 25. 26. bit with a blacke frost
 27. it bootes not
 29. 31. as good sit still

February

♄ *Saturne* riseth and settech with the *Sunne*, *Jupiter* is South. east at Sun setting; *Mars* is in the mid heauen when ☉ goeth downe. *Venus* is our bright evening star, *Mercurie* waigheith at his masters heeles.

New Moone the second Day at 8 a clocke and 37 minuts at night, the 3 of ♀ ascending, bitter cold weather most part of this quarter, and noe without frost and snow.

First quarter the 10 Day at 9 a clocke 24 minutes in the fornoone the 25 of ♀ ascending, & 11 and 12 daies, somewhat turbulent, the rest of the quarter more temperate.

Fall Moone the 16 Day, 3 quarters of an houre after mid-night 17 daies cold and frosty, the 18 and 19 much rains, the 20 and 23 stormy daies.

Last quarter the 24 Day, 24 minutes before noone, the 12 of ♀ ascending, very kindly weather, if the 26 prove dry.

- good daies
3. scarce out of the byars
 4. stoope and take it
 6. 7. but cold comfort
 8. the world is a mending
 11. 12. as true as sterle
 13. he needs no broker
 19. better may follow
 20. 21. all possible pleasure
 23. of patience comes ease
 25. 26. win it and weare it

- mild daies.
28. time is precious.
 1. 2. rise up and fall
 5. flame and fury
 9. 10. gape not after it
 14. 15. not worth the while
 16. in a world of woe
 17. 18. shallow breasted
 21. 22. in a pecke of troubles
 27. not at home nor abroad.

March

Bretnor 1611.

March

¶ *Saturne* and *Venus* are our morning starres. *Jupiter* is in the South at Sun-setting, *Mars* is South-west when *Sol* goes downe, *Mercury* is our evening starre hardly seene.

The first 2 and 3, not without winde and raine.
New moone the 4 day at one a clocke in the afternoone, the third of \nearrow ascending, a very kindly quarter, if the 9 and 10 agree.

First quarter the 11 day at 5 a clocke & 10 minutes in the afternoone the 22 of \nearrow ascending, kindly springing weather, if the 15 prove not stormy.

Full moone the 18 day, 23 minutes afternoone, the 6 of \nearrow ascending, somewhat blustering; the west of this quarter very reasonable if the 22 and 23 raine not.

Last quarter the 26 day, 3 quarters past 6 in the morning, the 23 of \nearrow ascending, & the 27, 28 and 29 lofty gales, the 30, 31 more wet then wished.

good daies.

- 3 the case is altered
- 5, 6 upon a doubtfull point
- 7, 8 well affected
- 11 please the old one
- 12, 13 it fits thy turne
- 14 as it is managed
- 19, 20, 21 the coast is cleare
- 25 delay breeds danger
- 28 is good farewell
- 30 what thou wilt aske

enill daies.

- 1, 2 rise and repent
- 4 at least in sight
- 9, 10 bane in the end
- 15, 16 hard hap
- 17 against the stream
- 18 no favour at court
- 22, 23 from euill to worse
- 26, 27 shunke in the wetting
- 29, 31 neither will serue

Aprill

¶ *Saturne*, *Venus*, and *Mercury*, are all day stars, *Jupiter* is in mid-heaue at Sun-set, *Mars* is South west when *Sol* goes downe.

The 1 and 2 day something windy.
New moone the 3 day at 2 a clocke and 17 minutes in the morning, the 24 of \nearrow ascending, & the 4, 5 and 6 daies cloudy and ouer cast, the 7 and 8 some springing showers.

First quarter the 9 day, at 10 a clocke, and 40 minutes at night, the 8 of \nearrow ascending, a kindly season is promised if the 13 and 14 prove not stormy.

Full moone the 17 day a quarter past one in the morning, the 20 of \nearrow ascending; the 17 day cloudy, the 18, 19 and 20 some wisting winds, and the 21, 22 no great change.

Last quarter the 25 day at one a clocke & 6 minutes in the morning, the 27 of \nearrow ascending, some springing showers are signified,

A Prognostication

missed this quarter, especially the 28 and 29 Dates.

Good Dates.

- 2.3 with much adoe
- 4 more hope then before
- 6 as tame as a lambe
- 8 as sure as a cheeke
- 11.12 honey and gall
- 13.16 reasonable toward
- 17 flacke and sure
- 20 his wit is his warrant
- 22 bestirring beelines
- 23 calme after a storme
- 27.28 well met
- 29.30. redeme the time

Evill Dates.

- 1 not too fast
- 3 his wits are breecht
- 7 Dangerous Drawing
- 9 over the left shoulder
- 10 backwards is best
- 12.14 a fronting aduersary
- 18.19 neither egge nor bird
- 21 walke warily
- 24.25.26 hearken not to it

May.

¶ *Saturne* walketh softly before the Sun, *Jupiter* and *Mars* are South west at Sun-set, *Venus* is our bright morning star, *Mercury* keepeth his master company.

The first day some blasts adreeding.

New moone the 2 Day 47 minutes after noone the 10 of *Virgo* ascending &c. the 3 and 4 Dates very variable, the 5.6 and 7, both wind and raine.

First quarter the 9 Day at 4 a clocke in the morning the 27 of *ascension*, continuance of wind and moisture is signified this quarter, and chiefly the 12.13 and 14 Dates.

Full moone the 16 Day, 50 minutes past 2 a clocke in the after noone, the 11 of *ascension*, a very variable quarter where in thunder, haile, and such tempestuous weather is threatened, & that about the latter end thereof.

Last quarter the 24 Day at 5 a clocke 32 minutes in the after noone, the 14 of *ascension*, subject to thunder, the rest of the quarter more milde and temperate.

New moone the last day at 9 a clock, and 10 minutes at night, the 2 of *ascension*, disposed to raine.

Good Dates.

- 1 a little fore
- 5.6. it will square well
- 7 for no time passe
- 10.11 graced of the greatest
- 13.14 but a hard diste
- 15 present preferment
- 17.18 prayer may prevaile
- 21.22 hope in the end

Evill Dates.

- 2.3 beware the afterclap
- 4 hand over head
- 8.9 a rope and a halter
- 12 close undermining
- 16 quite out of credit
- 19 labour and toils
- 20 in bucklers handling
- 24 wide well have a fall

Bretnor. 1611

23. strike while tis hote.
25. a present for a Prince.
27. blame none but thy selfe.
28. 29. thine owne by law.

26. be not too hottie.
30. 31. lower head and eares.

June.

¶ *Saturne* is Southeast at Sun rising, *Jupiter* and *Mars* are bright evening starres, *Venus* is our chearefull day-starre, *Mercurie* waikes at his maisters heeles,

The 1. 2. and 3. daies very soultrey weather and thunder, the 4. and 5. a haile storme threatened

First quarter the 7 day at 11. a clocke 24. minutes before noone the 10. of π ascending, a very seasonable time, if the 11. 12. and 14. prove not too caline.

Full Moone the 15. day at 5. a clocke in the morning, the 19. of π ascending, & the 16. and 17. daies lofrie winds and thunder presignified, the 18. 19. and 20. some sommer showers.

Last quarter the 23. day at 7 a clocke 42. minutes in the morning, the 23. of π ascending, and 24. and 25. daies soultrey hote, the 26. and 27. some sudden showers.

New Moone the last day at 4 a clocke and 2 minutes in the morning, the 19. of π ascending, the Sun rising eclipsed, variable weather.

Good daies.

1. 2. & 4. when thy turne comes.

July.

¶ *Saturne* appeareth South at Sunne rising, *Jupiter* begins to shroud him vnder Sols wings; *Mars* is our evening starre, *Venus* is our bright morning starre.

The 1. 2. & 3. dayes some windie storme or thunder-clap, the rest of the quarter seasonable.

First quarter the 6. day at 8. a clocke 24. minutes at night, the 28. of π ascending, and 7 and 8. daies lofrie winds, the 9. 10. 11. and 12. some cooling showers.

Full moone the 14. day at 8. a clocke 20 minutes at night, the 13. of π ascending, some thunder and haile stormes presignified.

A Prognostication.

Red this quarter, especially the 17. and 18. daies.

Last quarter the 21. day at 7 a clocke 24. minutes in the evening, the 3. of π ascending, something drapping, the rest of the quarter seasonable, except the 27. and 28. wherein stormy thunder is threatned.

New Moone the 29. day at 11. a clocke in the forenoone, the 23. of π ascending, kindly sommer weather, the 30. disposed to thunder.

Good daies.

1. boote and the better.
4. & 5. it falls in his mouth.
7. it lies a bleeding.
9. it sits thy turne.
11. & 12. in the way of amendment.
19. no penny, no pater noster.
20. fresh and fasting or not.
21. long ere it fade.
24. a good pate helps.
28. mutuall concord.
31. as she is handled.

Evill daies.

2. among the hyeres.
3. looke ere thou leape.
6. a bare excuse.
8. haunt not his company.
10. & 15. as good be idle.
14. too great odds.
16. beware the stab.
18. in a desperat safe.
21. & 24. all's fish that comes to net.
17. & 25. & 27. the market is marbe.
29. & 30. no enation.

August.

\S Saturne is South-west at Sun-rising, Jupiter is covered with the Suns mantle, Mars begins to hide himselfe in the evening, Venus is our wished morning starre, Mercury prosecutes milde Jupiter.

The 1. 2. and 3. daies good harvest weather.

The first quarter the 5 day at 8 a clocke and 55. minutes in the morning, the 5. of π ascending, and the 6. 7. and 8. daies very seasonable, the 9. 10. 11. & 12. some stormy blasts now and then.

Full Moone the 13. day 12 minutes before noone, the 11. of π ascending, and the 14. day some thider or haile storms threatned, the rest of the quarter kindly weather.

Last quarter the 21. day at 4 a clock 55. minutes in the morning, the 4. of π ascending, a temperate season if winds blustre not.

New Moone the 27. day at 6 a clocke 51. minutes in the afternoone, the 25. of π ascending, and the 28. 29. 30. and 31. daies, something cloudy and onerast.

Good daies.

1. 2. all halle.
3. 4. Chamelion like.
6. a prize if practised.
7. please for preferment.

Evill daies.

5. twist hawke and buzzard.
8. & 12. & 15. no way to win.
13. & 14. against the haire.
20. & 21. account not of it.

Bretnor 1611.

9 be earnest or it.
 10. 11 hardly effected.
 16. 17. both cup and coner.
 18. 19. on a slippery pin.
 23. be not dissuaded.
 25. either now or neuer.
 29. 30 a hopefull issue.

12. Backward and forward.
 24. halfe makes waste.
 26. a vaine enterprisse.
 27. 28. fire and tow.
 31. at too high a rate.

September.

¶ 2 to Sol, riseth when he setteth, *Jupiter* and *Venus* are both morning starres, *Mars* and *Mercury* attend the Sunnes pleasure.

The first and second daies some moisture if the winde be. First quarter the third day 40 minuts after midnigh. the 28. of 5 ascending, and the 4 and 5. good harvest daies, the 6. 7. 8. and 9. not without some stormy galls intermied.

Full moone the 12 Day at 3. a clocke and 10. minuts in the morning, the 28. of 2 ascending, something boisterous, the rest of the quarter good harvest weather.

Last quarter the 19. day at high noone, the 6. of 2 ascending, & the 20. 21. 22. daies very seasonable, the 23. 24. and 25. more open and turbulent.

New moone the 26. day, halfe an houre past foure in the morning, the 22. of 12 ascending, a toultry and vntwofolome change, accompanied with some stormy blasts or thunder-claps.

Good daies.

1. in the way of preferment.
 3. as good as his word.
